About Me

IT enthusiast with intensive backend development training in Go, complemented by frontend work using React and NextJS acquired through two bootcamps.

Additionally, I've developed over eight mobile apps and games using Unity, deploying them on Google Play, Samsung Galaxy, and Amazon Appstore.

Leveraging 3.5 years as a Production Operator, I bring strong problem-solving skills and attention to detail. I am eager to contribute technical skills to the IT industry.

Skills Highlight

- Go
- PostgreSQL
- MySQL
- Git
- Unity Engine
- C#
- ReactJS
- NextJS
- Firebase
- PlayFab
- Admob

Languages

- Bahasa Indonesia
- Basa Sunda
- English

Latest Projects

Web Template E-Commerce App

The Web Template E Commerce App is a comprehensive full-stack application. It integrates Go and MySQL on the backend with a frontend crafted using NextJS and styled with Tailwind CSS. The application is deployed on Vercel.
